

Clinical Evaluation Policy

The Bryan College of Health Sciences Clinical Evaluation System is designed to assist the student in meeting standards necessary to provide quality care. Evaluation is based on individual progress made toward attainment of course objectives.

Evaluation is an ongoing process with the final decision being made at the completion of the course. The role of the instructor in evaluation is to observe and measure the student's performance during the clinical experiences, provide timely feedback about performance strengths and areas needing improvement and to document observations, conclusions and recommendations.
